

amiga Career Day 2022 Fact Sheet for Exhibitors

Exhibition Tool „Talentspace“

This year, amiga is using "Talentspace", an online tool that offers various great features (such as a talent database with search function) and common virtual interaction formats (rooms).

- Each exhibitor automatically receives
 - a **"Company Profile"** that looks like a landing page; you also have the opportunity to publish specifically open vacancies here.
 - as well as a **"Live Booth" = virtual exhibitor booth.**
Initial discussions with candidates are possible here (video chat and chat)
- *Optional: Lecture with interactive elements (= Session)*
In addition to your exhibitor booth, you have the opportunity to give a lecture at amiga Career Day, such as a company presentation or an industry talk, many variants are possible here. Please do not hesitate to contact us if you are interested. Exchange in the group (Q&A's) is possible; up to 6 participants can be brought onto the "stage" (visible and with sound), including chat function.
- *Optional: 1:1 Chat*
In a protected room, one-on-one talks/short interviews can be conducted with selected visitors (matching your profiles) from the Live Booth.

First impressions about [Talentspace](#) on their website or in this [Video](#).

Next Steps / Procedure

1. **Complete the registration form for exhibitors:** Please click on this [Link](#).
Once you completed this form, we will add you as an exhibitor to Talentspace. Then, you will receive your login data and can start setting up your Live Booth.
2. *Mid-September/beginning of October: Setup of your Live Booth (updates & finalization)*
You will receive further detailed information from us after the summer break. On this [Talentspace Helpcenter](#) page, you can also find more details that may concern you as a recruiter/company.
3. **At amiga Career Day (27 October 2022):**
As an exhibitor, you "only" need to be available for questions from participants during a certain time slot at your "Live Booth". We recommend at least 2 hours. You can also adjust the time window if necessary.
For the options "lecture" or "1:1" chats, you can also select individual time windows.
